JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Angle-resolved valence band photoemission
Angle-resolved ultraviolet photoelectron microspectroscopy 1
Auger electron emission microscopy
Spectromicroscopy in a low energy electron microscope 201

Charging effects
Spectromicroscopy and chemical imaging by laterally-resolved ESCA 109
Chemical sensors
Spectromicroscopy and chemical imaging by laterally-resolved ESCA 109
Copper
Angle-resolved ultraviolet photoelectron microspectroscopy 1

Diamond chemical vapor deposition
Applications for small photoelectron emission microscopes 129
Diffusion
Angle-resolved ultraviolet photoelectron microspectroscopy 1

Electron spectroscopy
A photoemission microscope with a hemispherical capacitor energy filter 211
Elemental and chemical imaging
ESCA Microscopy at ELETTRA: what it is like to perform spectromicroscopy experiments on a third generation synchrotron radiation source 73
ESCA
A photoemission microscope with a hemispherical capacitor energy filter 211,
Spectromicroscopy and chemical imaging by laterally-resolved ESCA 109

Grazing incidence mirror
The scanning soft X-ray microscope at Hasylab: imaging and spectroscopy of photoelectrons, photoluminescence, desorbed ions, reflected, scattered and transmitted light 29

High temperature superconductor
Photoelectron spectromicroscopy as a microchemical probe of high temperature superconductors 149

Ilmenite
High-resolution X-ray absorption microspectroscopy of lamellar phases in natural ilmenite 159

Lateral resolution
Angle-resolved ultraviolet photoelectron microspectroscopy 1
LEEM
SMART: a planned ultrahigh-resolution spectromicroscope for BESSY II 231
Local changing effects
ESCA Microscopy at ELETTRA: what it is like to perform spectromicroscopy experiments on a third generation synchrotron radiation source 73
Low energy electron microscopy
Spectromicroscopy in a low energy electron microscope 201

Magnetic domain imaging
Imaging of magnetic domains by photoemission microscopy 189
Metal semiconductor interface
ESCA Microscopy at ELETTRA: what it is like to perform spectromicroscopy experiments on a third generation synchrotron radiation source 73
Microscopy
A photoemission microscope with a hemispherical capacitor energy filter 211
Microspectroscopy
Angle-resolved ultraviolet photoelectron microspectroscopy 1
PISAM: a photon-induced scanning Auger microscope 9
The scanning soft X-ray microscope at Hasylab: imaging and spectroscopy of photoelectrons, photoluminescence, desorbed ions, reflected, scattered and transmitted light 29
Recent progress in photoemission microscopy

with emphasis on chemical and magnetic sensitivity 171
MMC
Comparative magnetic-field imaging, electric-field imaging, and scanning Auger microscopy study of metal–matrix composites 99

Neurobiology
Photoelectron spectromicroscopy with synchrotron radiation: applications to neurobiology 137
NEXAFS
X-ray spectromicroscopy of polymers and tribological surfaces at beamline X1A at the NSLS 53

PEEM
A photoemission microscope with a hemispherical capacitor energy filter 211
Photoabsorption
Comparative magnetic-field imaging, electric-field imaging, and scanning Auger microscopy study of metal–matrix composites 99
Photoelectron emission microscope
Applications for small photoelectron emission microscopes 129
Photoelectron emission microscopy
Photoelectron spectromicroscopy as a microchemical probe of high temperature superconductors 149
Photoelectron microscopy
Thermal desorption of oxides on Si(100): a case study for the scanning photoelectron microscope at MAX-LAB 45
Photoemission
Photoelectron spectromicroscopy with synchrotron radiation: applications to neurobiology 137
A photoemission microscope with a hemispherical capacitor energy filter 211
Photoemission Auger microscope
PISAM: a photon-induced scanning Auger microscope 9
Photoemission microscopy
Recent progress in photoemission microscopy with emphasis on chemical and magnetic sensitivity 171
Imaging of magnetic domains by photoemission microscopy 189
Multipole WIEN-filter for a high-resolution X-PEEM 251
Photoninduced scanning Auger microscope
PISAM: a photon-induced scanning Auger microscope 9
Polymers
X-ray spectromicroscopy of polymers and tribological surfaces at beamline X1A at the NSLS 53

Scanning soft X-ray microscopy
The scanning soft X-ray microscope at Hasylab: imaging and spectroscopy of photoelectrons, photoluminescence, desorbed ions, reflected, scattered and transmitted light 29
SiC fiber
Comparative magnetic-field imaging, electric-field imaging, and scanning Auger microscopy study of metal–matrix composites 99
Silicon-oxide
Thermal desorption of oxides on Si(100): a case study for the scanning photoelectron microscope at MAX-LAB 45
Silver
Angle-resolved ultraviolet photoelectron microspectroscopy 1
Small-spot LEED
SMART: a planned ultrahigh-resolution spectromicroscope for BESSY II 231
SMART
SMART: a planned ultrahigh-resolution spectromicroscope for BESSY II 231
Soft X-ray spectromicroscopy
Soft X-ray spectromicroscopy development for materials science at the advanced light source 85
Spectromicroscopy
Thermal desorption of oxides on Si(100): a case study for the scanning photoelectron microscope at MAX-LAB 45
Spectromicroscopy and chemical imaging by laterally-resolved ESCA 109
Photoelectron spectromicroscopy with synchrotron radiation: applications to neurobiology 137
Photoelectron spectromicroscopy as a microchemical probe of high temperature superconductors 149
Recent progress in photoemission microscopy with emphasis on chemical and magnetic sensitivity 171
Spectromicroscopy in a low energy electron microscope 201
Multipole WIEN-filter for a high-resolution X-PEEM 251
Spectroscopy
X-ray spectromicroscopy of polymers and tribological surfaces at beamline X1A at the NSLS 53
Surface chemical analysis
High-resolution X-ray absorption microspectroscopy of lamellar phases in natural ilmenite 159
Surface chemical inhomogeneity
Photoelectron spectromicroscopy as a microchemical probe of high temperature superconductors 149
Surface diffusion

Applications for small photoelectron emission microscopes 129
Surface magnetism
Recent progress in photoemission microscopy with emphasis on chemical and magnetic sensitivity 171
Imaging of magnetic domains by photoemission microscopy 189
Synchrotron radiation
Soft X-ray spectromicroscopy development for materials science at the advanced light source 85
Photoelectron spectromicroscopy with synchrotron radiation: applications to neurobiology 137
Synchrotron spectromicroscopy
ESCA Microscopy at ELETTRA: what it is like to perform spectromicroscopy experiments on a third generation synchrotron radiation source 73

Topographical effects
ESCA Microscopy at ELETTRA: what it is like to perform spectromicroscopy experiments on a third generation synchrotron radiation source 73
Tribology
X-ray spectromicroscopy of polymers and tribological surfaces at beamline X1A at the NSLS 53
Applications for small photoelectron emission microscopes 129

Ultrahigh-resolution spectromicroscope
SMART: a planned ultrahigh-resolution spectromicroscope for BESSY II 231

WIEN filter
Multipole WIEN-filter for a high-resolution X-PEEM 251

X-ray absorption microspectroscopy
High-resolution X-ray absorption microspectroscopy of lamellar phases in natural ilmenite 159
X-ray absorption spectroscopy
Photoelectron spectromicroscopy as a microchemical probe of high temperature superconductors 149
X-ray microscopy
X-ray spectromicroscopy of polymers and tribological surfaces at beamline X1A at the NSLS 53
X-ray photoelectron emission microscopy
High-resolution X-ray absorption microspectroscopy of lamellar phases in natural ilmenite 159
X-ray photoelectron microscopy
Comparative magnetic-field imaging, electric-field imaging, and scanning Auger microscopy study of metal–matrix composites 99
XPEEM
SMART: a planned ultrahigh-resolution spectromicroscope for BESSY II 231
XPS
X-ray spectromicroscopy of polymers and tribological surfaces at beamline X1A at the NSLS 53
